Subject: New GSDT user account

Good afternoon Tim,

A new individual Geologic Sequestration Data Tool (GSDT) account has been created for you for the  Storage Project (R09-CA-0009). Information regarding your login credentials can be found below.

Username: CA-0009-tgross

You will receive a temporary password via encrypted e-mail from an EPA contractor with the subject line "Sequestration Account" in the next one to two business days. It is strongly recommended that you **change your password the first time you log in**. The account password can be changed by clicking on your username, which appears in the top right corner of the landing page at <https://gsdt.pnnl.gov/share/page/operators>. A 10-character or pseudo-random password is strongly advised for security.

Firefox and Chrome are the supported web browsers for using the system. Please note that to open the GSDT User Guides in Chrome, you will need to right click on the link and select "open in new tab." GSDT tutorial videos available at <https://www.epa.gov/uic/geologic-sequestration-data-tool-gsd-tutorial-videos>.

Individual(s) who are responsible for signing Class VI permit application materials must submit a signed and notarized Electronic Signature Agreement (ESA) to EPA. Additional information on this document, including the downloadable ESA form, is available on the GSDT operator landing page. Other users supporting data preparation will be able to access the project, but may not sign and submit Class VI data to the permitting authority without an ESA. Should you have any questions, please don't hesitate to contact us at GSDataTool@epa.gov.

Best regards,
EPA GSDT Team
